PROJECT PROFILE: Bridge Girder Strengthening

Repair System: QuakeWrap Wet Layup application of FRP

Project Client: VIET-JAPAN ADVANCED TECHNOLOGY (JVTEK), Dong Da Dist., Ha Noi, VietNam

Location: Lan Thap Bridge, Quang Ninh Province, Vietnam

Project Synopsis:

QuakeWrap® repair system using a wet layup application of carbon fiber reinforced polymer (FRP) was the selected material to provide the desired solution. QuakeWrap's carbon fabric and QuakeBond™ resin was applied to all pre-stressed girders for shear and bending strengthening.
